BEFORE

IMPLANT EXCHANGE

If you're dealing with the negative impacts of capsular fibrosis, don't suffer any longer – our implant exchange surgery can help you get your life back. You deserve to feel confident and pain-free, and we're here to make that happen.

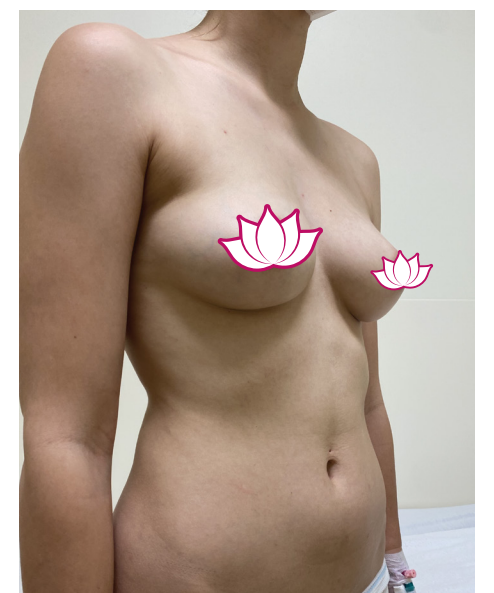

FAT TRANSPLANT BREAST

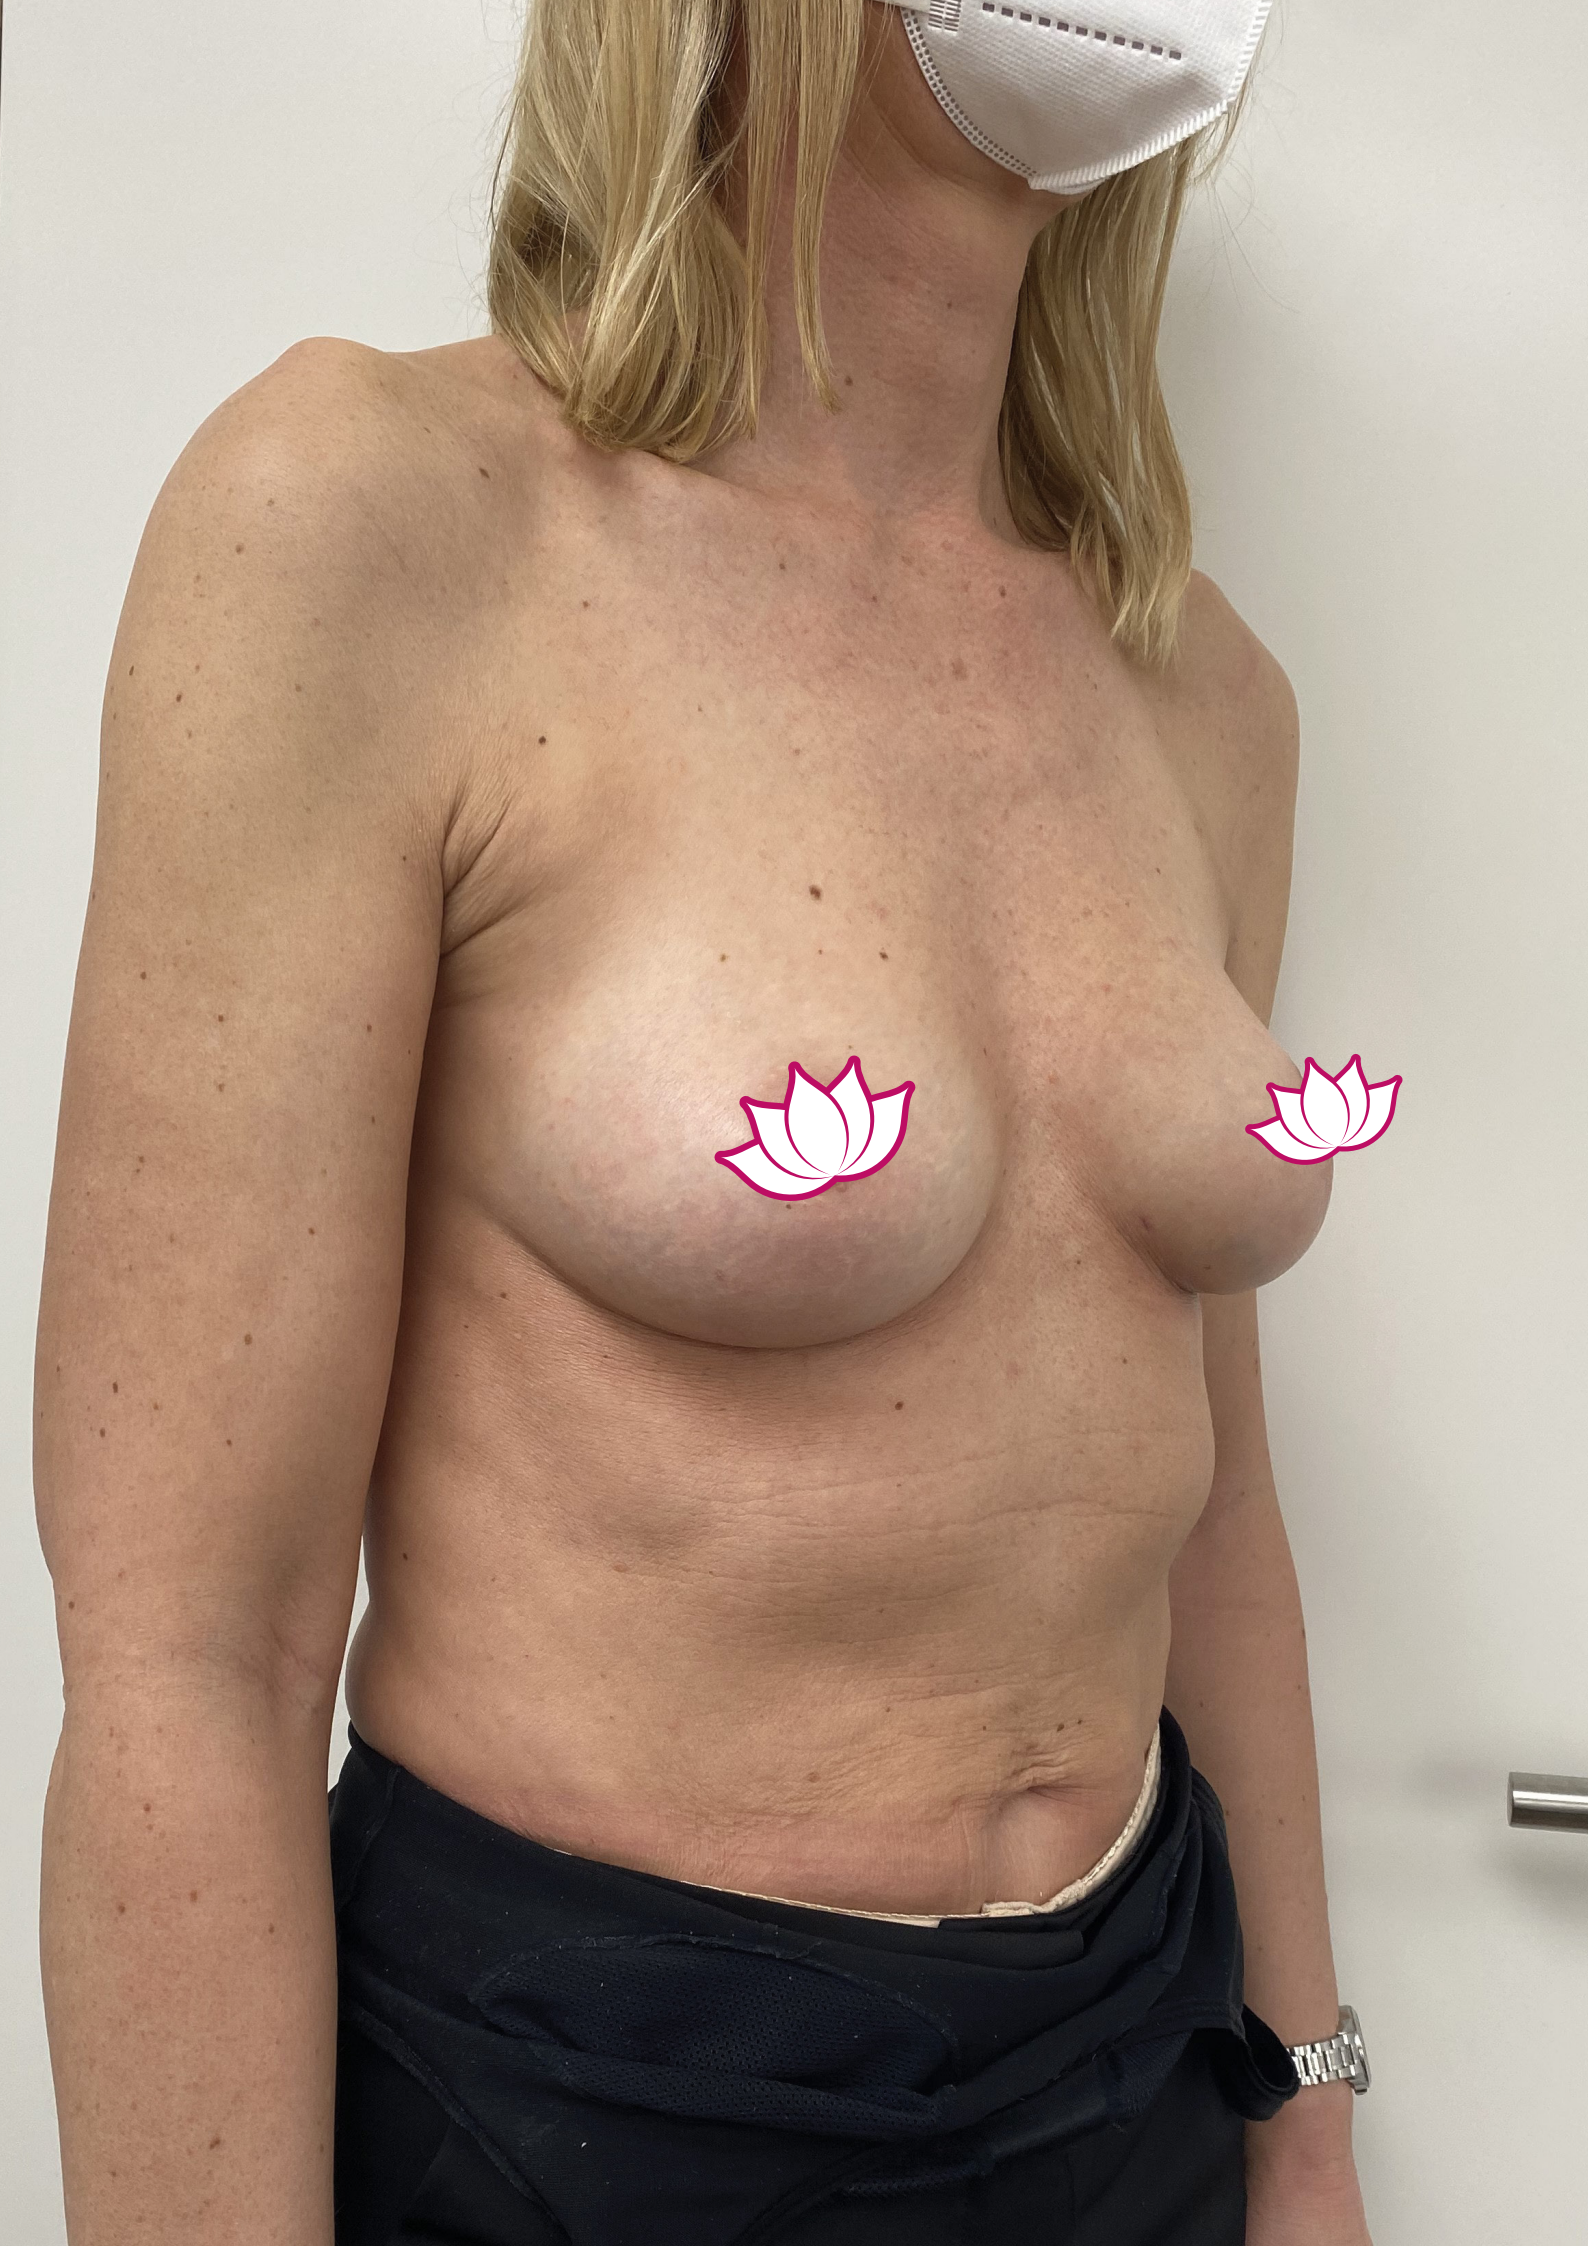

Looking for a breast augmentation option that comes with zero risks? Look no further than fat transfer breast augmentation at Dr. Wolf's clinic. This procedure uses your own fat to increase the size and volume of your breasts, giving you a natural look that you'll love. Plus, there's no risk of implant rejection or infection, so you can enjoy your new breasts with peace of mind.

3 months after liposuction of abdomen and flanks and lipo transfer to the breasts both side a 380ml.

BEFORE

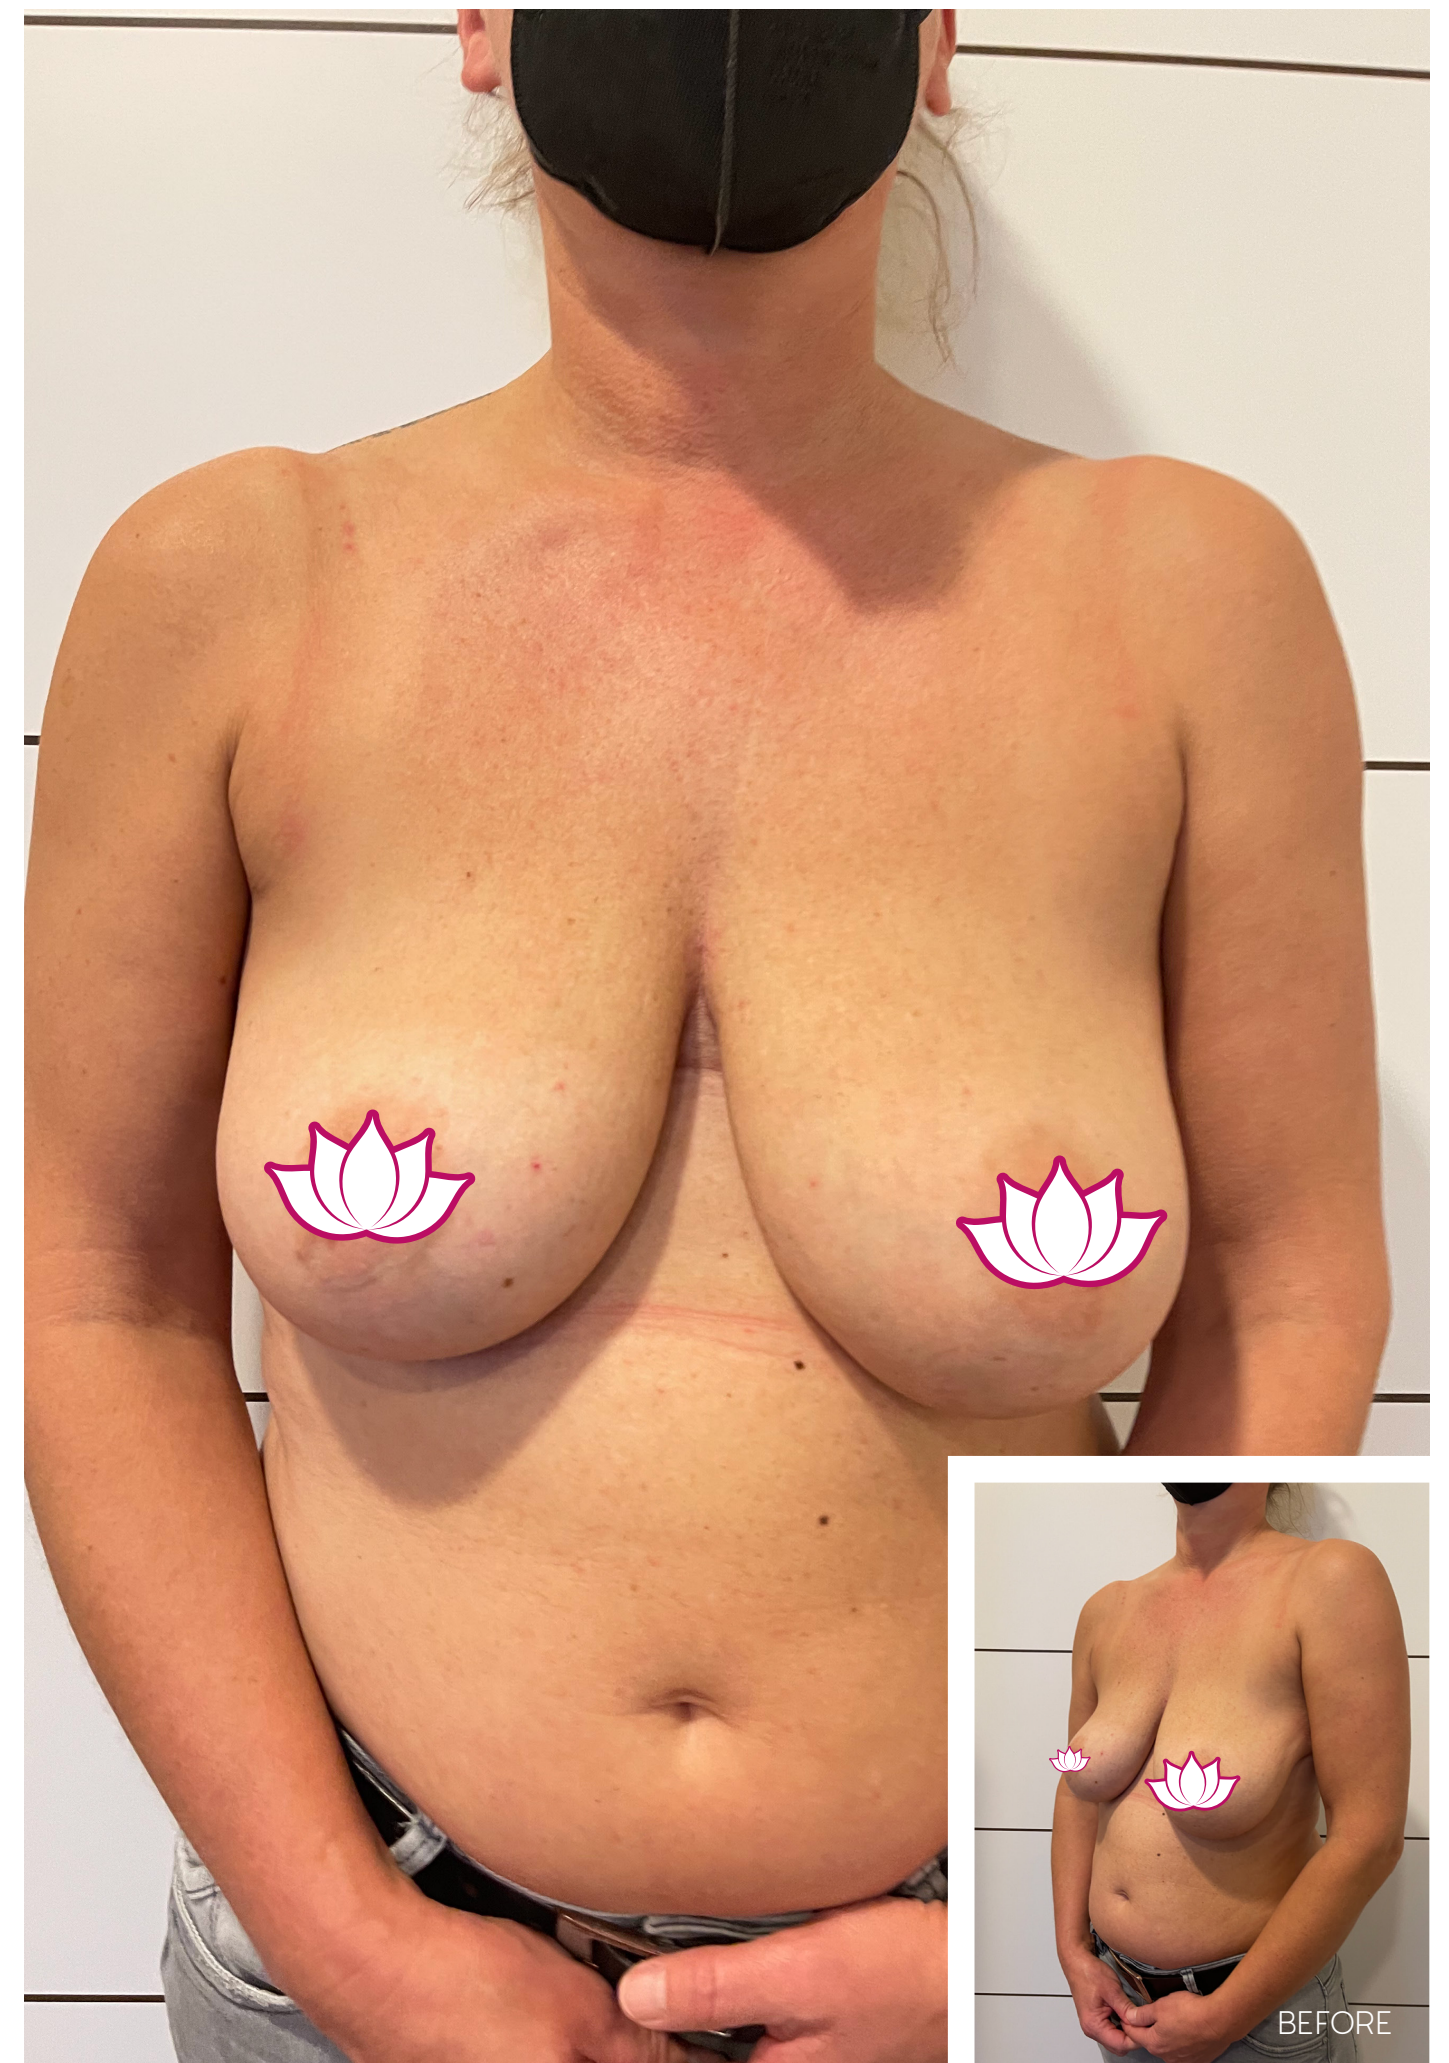

MASTOPEXIE

Mamma reduction plasty or mastopexy can help you achieve a happy, quality life by reducing the weight of your breasts. With my team and me, Dr. Wolf, and our state-of-the-art facilities, we can help you achieve your goals safely and effectively!

47 year female patient, 5 months postoperative a short scar mastopexy

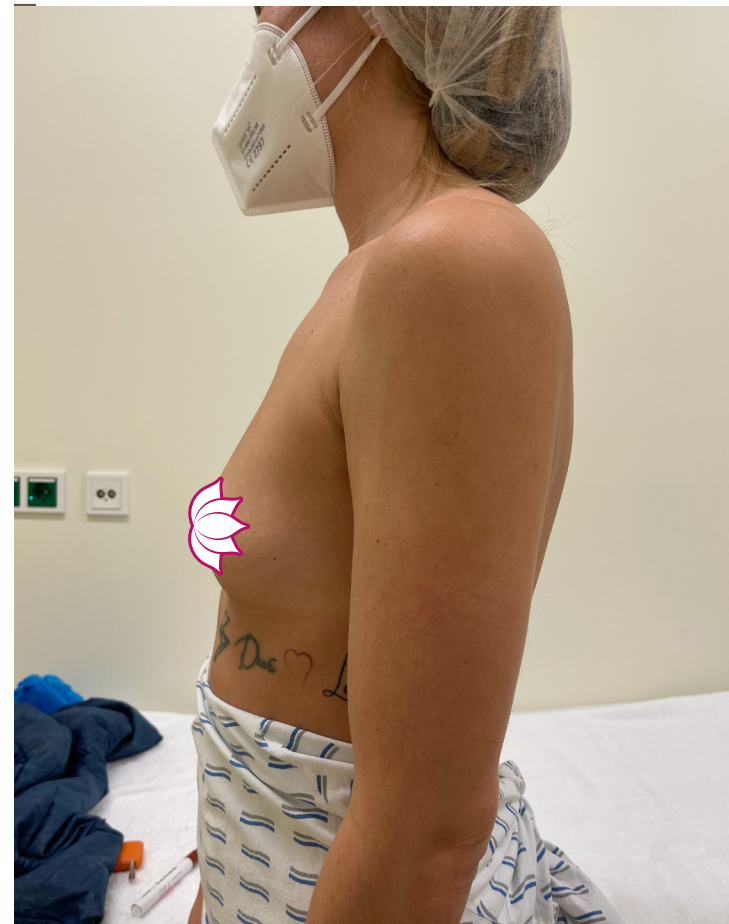

BREAST AUGMENTATION

Looking for a breast augmentation that is painless, has a fast recovery, and can be done in an ambulatory setting?

Look no further than my Breast Augmentation! This new technique uses a muscle split technique that is not only less painful, but also allows you to recover quickly and get back to your life!

LIPOSUCTION

Looking to improve your body contouring and boost your self confidence? Look no further than our Liposuction services. We will help you achieve the results you desire, so that you can finally love the way you look!

Liposuction ca 2000ml 27year old patient, flanks/love handles, upper and lower abdomen, 6 months after

BEFORE

ARM LIFT

You deserve to wear the clothes you want to wear and feel confident in your own skin. We provide a high-quality, long-lasting upper arm lift that will allow you to do just that. With our procedure, you'll be able to wear short-sleeved shirts and dresses with confidence, knowing that your arms look great!

65 year female patient, skin reduction with L-shaped upper arm lift, ambulatory setting in sedation, 7 months after operation

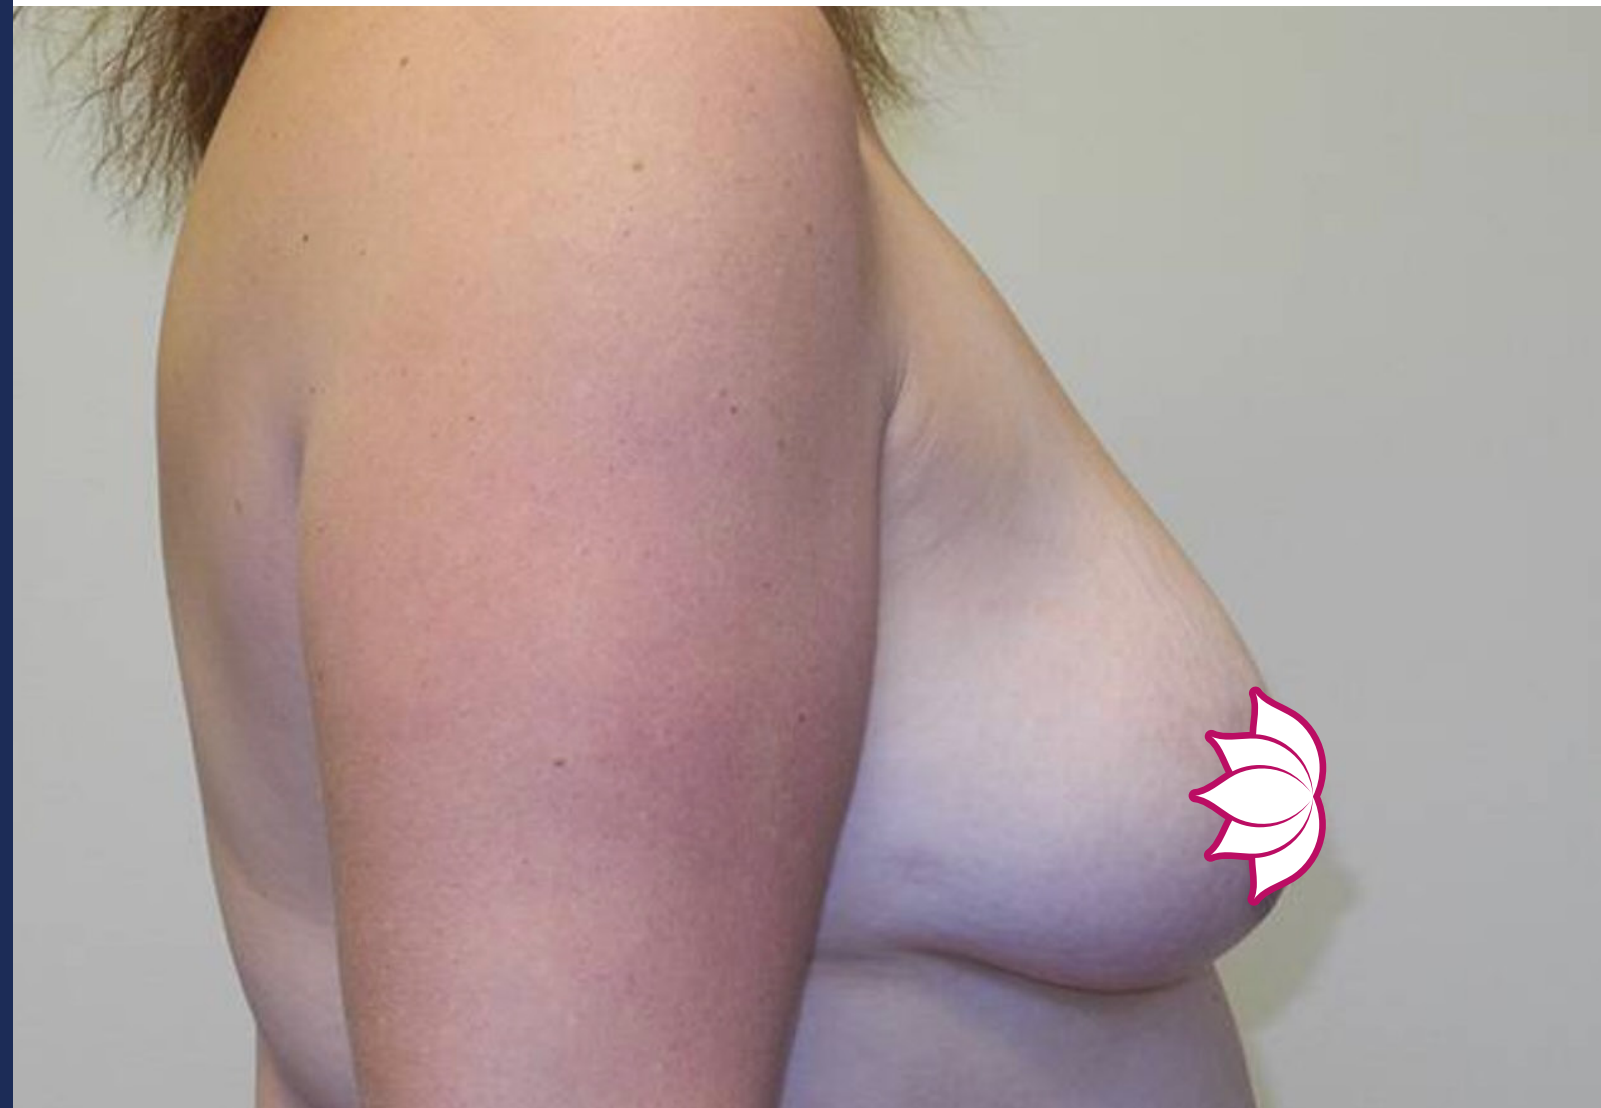

BEFORE

AUGMENTATION MASTOPEXIE

Looking to improve your breast shape and size? My team and me can help you achieve your goals through breast augmentation surgery. I specialized in a variety of techniques, including augmentation mastopexy (breast lift with implants) and breast implants alone. Whether you're looking to achieve a more youthful look or simply want to improve your self-confidence, we can help!

47 year female patient, 250cc anatomical shaped implants, augmentation mastopexy with short scar technique, 6 months postoperative

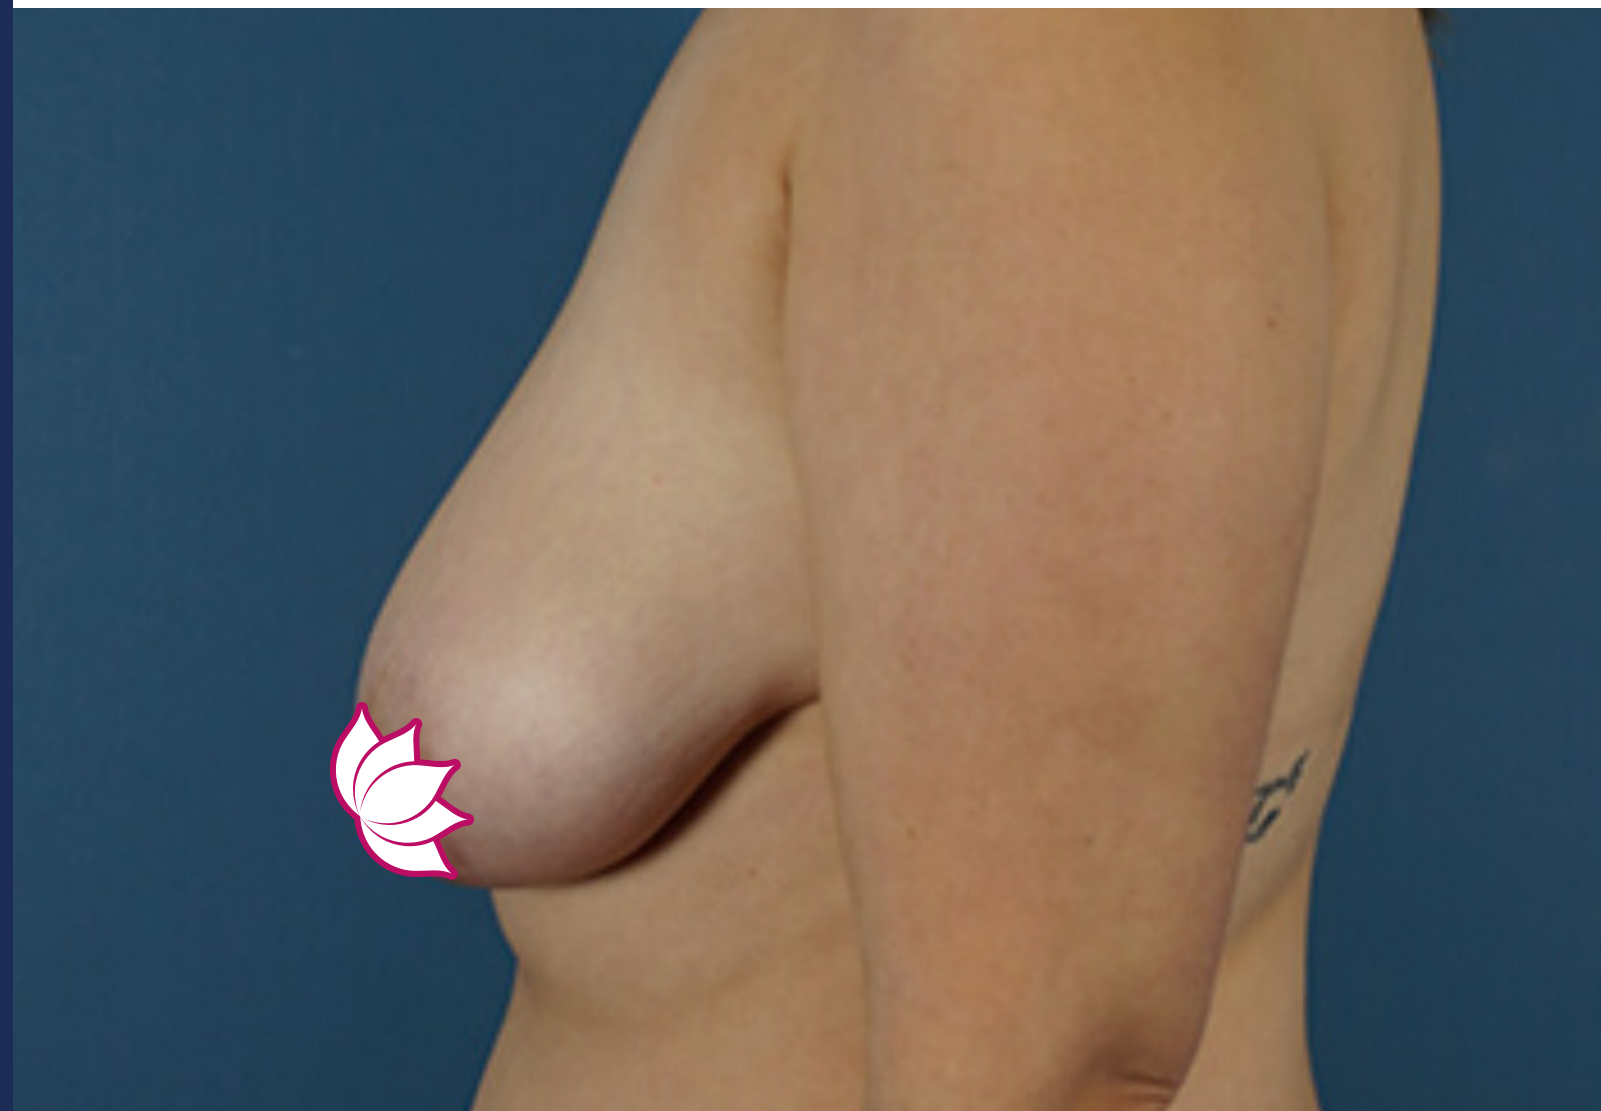

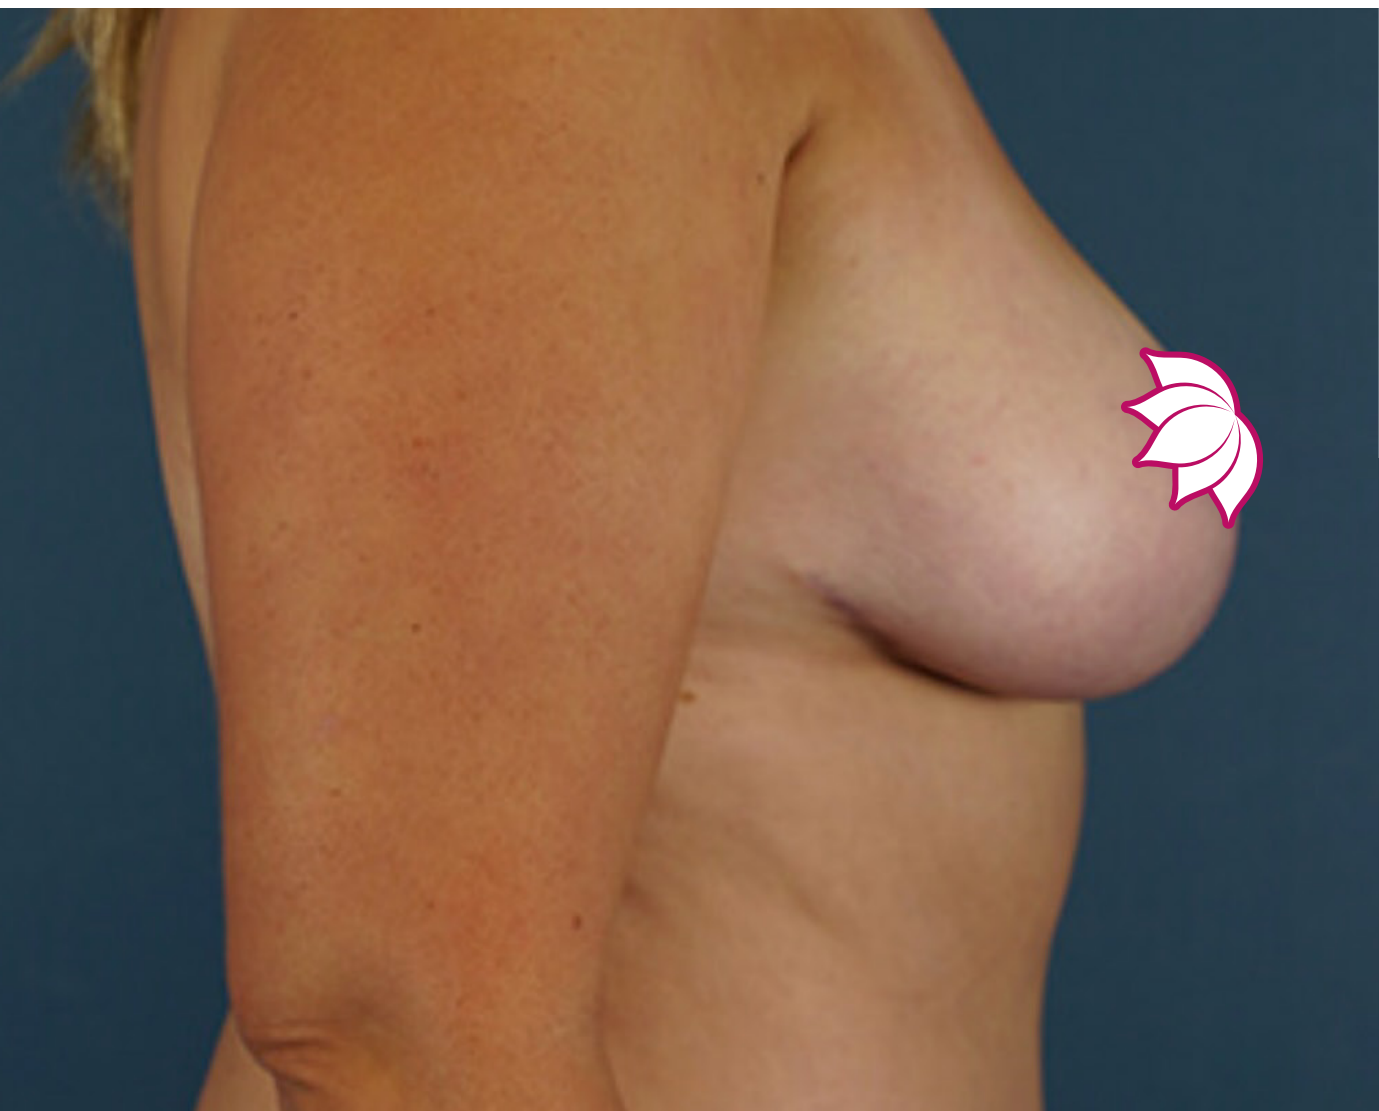

BEFORE

SHORT SCAR MASTOPEXIE

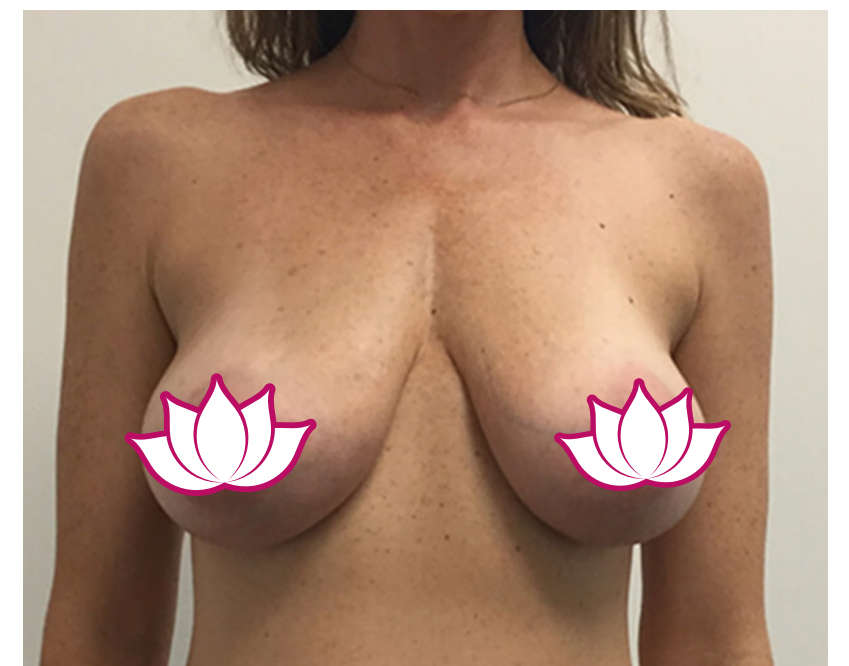

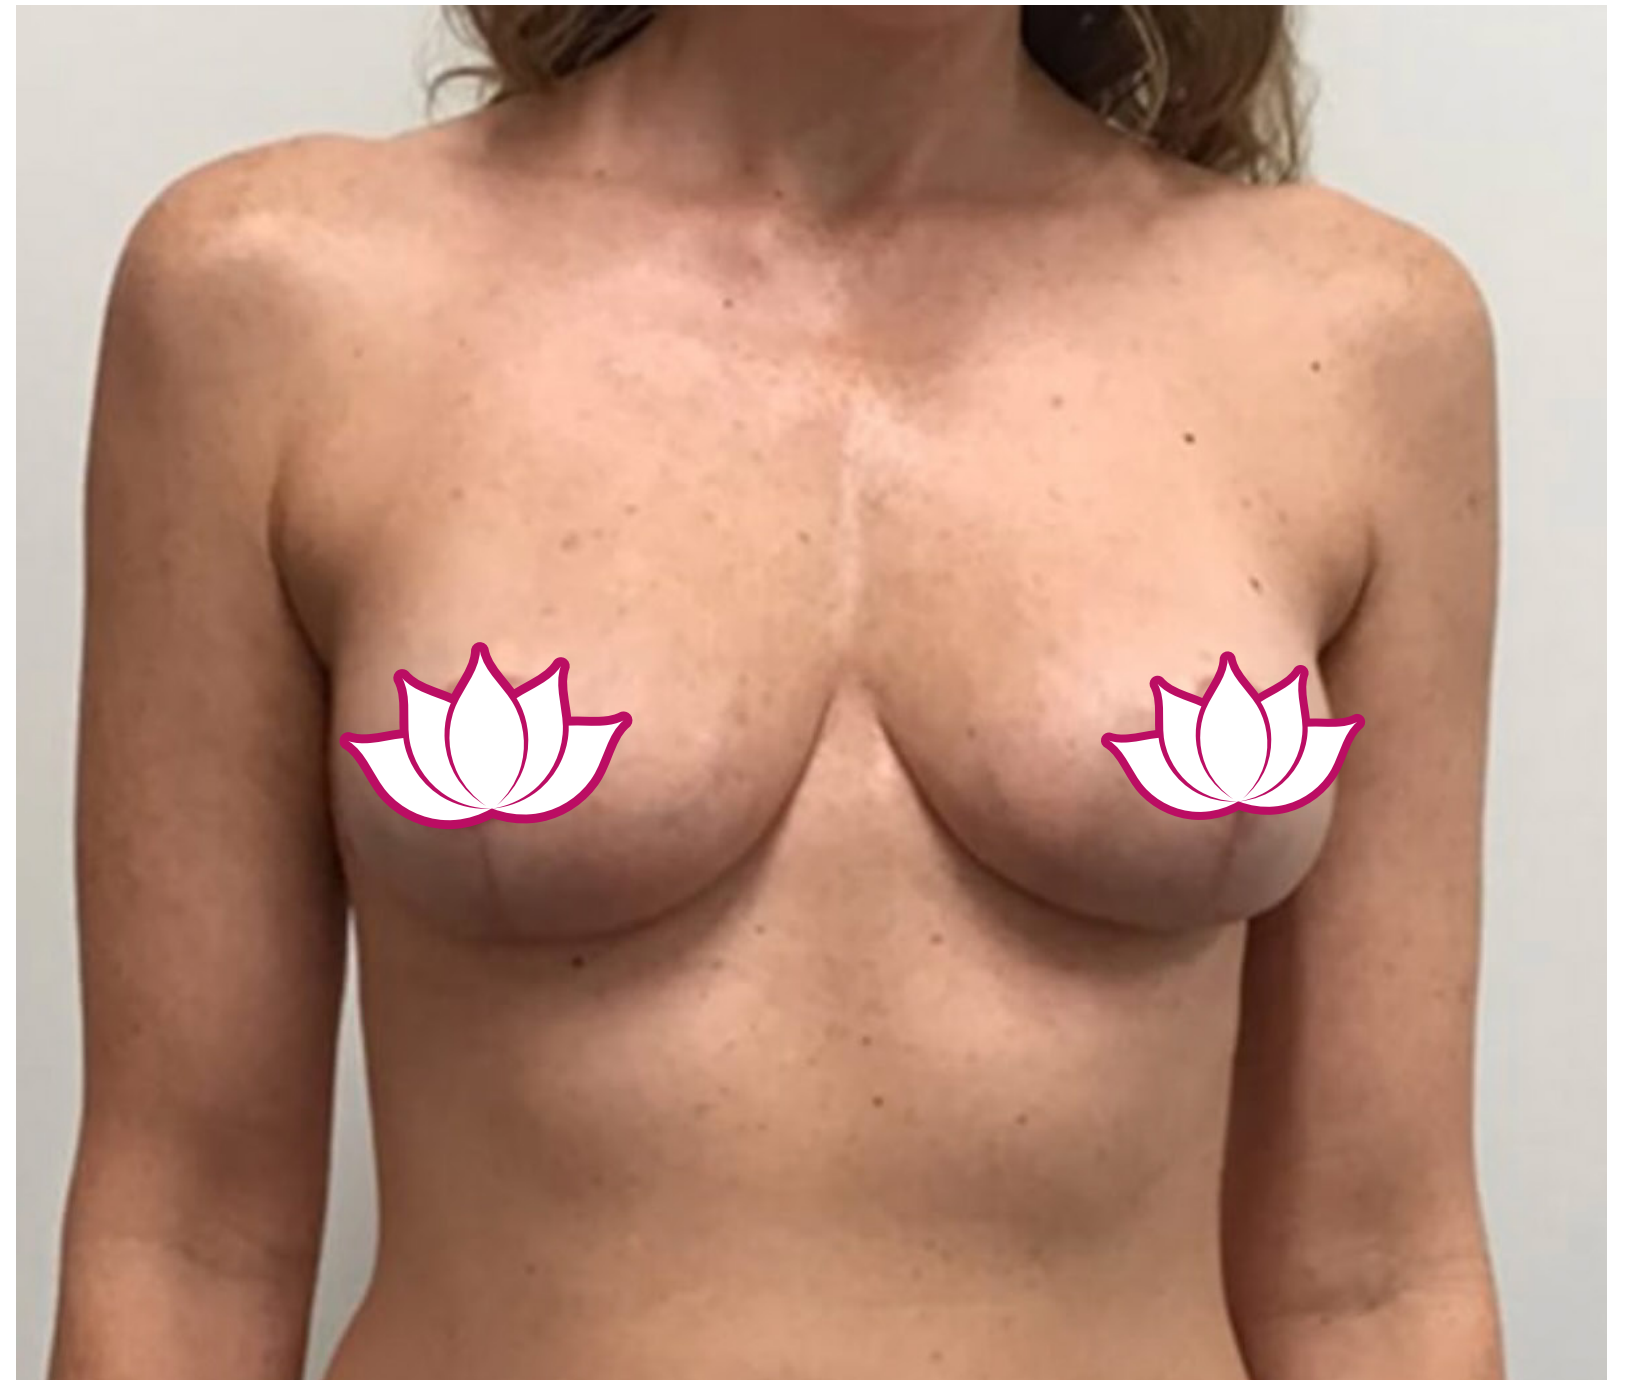

Short scar Mastopexy provides patients with less scarring, faster recovery times and less pain. This procedure can be performed in an outpatient setting, which means you can avoid a lengthy hospital stay.
